

Volunteer Planting Days May 14 & 15

Join us in planting thousands of native plants to create a beautiful buffer along 500' of lakeshore, Cherry Creek, and in a new rain garden at Winona Lake Limitless Park! These plants are *clean water superheroes*. They filter polluted runoff, hold the shoreline in place with their deep roots, feed pollinators, and deter geese from polluting the lawn!

We will provide snacks and refreshing beverages. Please bring work gloves and a shovel or garden trowel. If you don't have one, that's OK! We will have tools available.
